

Investigating Plants

What are we trying to find out?

What are we going to do?

What are we going to use?

How did we make it a fair test?

We must remember to _ _ _ _ _
the seeds.

I think the seeds....	soil	compost	sand	pencil shavings	fabric bits	tissues	gravel
will grow 							
won't grow 							
I'm not sure 							

Finding out about plants—example

What are we trying to find out?

Can seeds grow anywhere / in any materials?

What are we going to do?

Plant some seeds in different materials

What are we going to use?

Draw and label eg plant pots, seeds, watering jug etc.
List materials to be used (see below)

How did we make it a fair test?

Possible answers:

Fill the containers to the same level
Use same amount of water to keep seeds moist
Water at same time and with same amount of water
Put them in the same place to grow

We must remember to **water** the seeds.

I think the seeds....	soil	compost	sand	sawdust	fabric bits	tissues	gravel
will grow 	✓						
won't grow 							
I'm not sure 				✓
