

Name	Euoplocephalus
Meaning	Well-armoured head
Length	6 metres

SAMPLE ONLY

Interesting Facts : This was a large armoured dinosaur. It was protected by thick plates in its leathery skin and spikes along its body. It also had bony horns. When it swung its tail the hard, bumpy lump at the end was used as a club for hitting its enemies. Flipping it over was the only way to wound it.

# Euoplocephalus

Feeder	Plant-eater (herbivore)
